Intimate relationships in the 21st century are uniquely stressed by ideals of equality and reciprocity. The skills involved in negotiation with an equal partner — such as dealing with conflict respectfully, transcending power struggles, and authentically witnessing one another — are key elements of Dialogue Therapy. This is the first full training in Dialogue Therapy to be offered in the new model, which integrates mindfulness with psychoanalysis and psychodrama approaches. This model was revised to be consistent with *Love Between Equals: Relationship as a Spiritual Path*, by Polly Young-Eisendrath, to be published in January, 2019.

These four sessions of training, **offering 17 continuing education credits per session**, introduce participants to the history, theory and methodology of Dialogue Therapy. The first session is an overview taught by Polly Young-Eisendrath, Ph.D., that sets the framework for entering into both learning and skill development. The second session will be taught by Dr. Young-Eisendrath and Jean Pieniadz, Ph.D. who is the co-therapist and psychologist/psychoanalyst who has worked with Polly for more than a decade in offering and writing about Dialogue Therapy. Together, they will give an overview of the original co-therapist model of Dialogue Therapy and go into the details of using that model.

The third session, taught by Polly, will be an opportunity for participants to begin to practice with a live couple and to work with each other in developing their knowledge and skills. It will also introduce the solo model and its methods. The fourth and final session will be taught by Polly and Jean and will be a further opportunity to apply the methods and skills in working with a live couple and to practice the techniques of doubling, coaching, and role reversal interviews.

Completion of the four-session Foundational Training fulfills the requirements for full certification in Dialogue Therapy.

Nov. 29 - Dec. 2, 2018 | Polly Young-Eisendrath, Ph. D. and Jean Pieniadz, Ph.D.

This session features extensive video of a couple in Dialogue Therapy. The video will be used in interaction with teaching.
